

ENGINEERING

The textbooks and journals on engineering at De Gruyter Oldenbourg have a long tradition. We offer well-established textbooks in German language in the fields of electrical engineering and mechanical engineering.

Through regular revisions and updates, as well as new titles on current topics, we accompany the developments of research and teaching in the engineering sciences. Therefore, we also pay special attention to current interdisciplinary topics such as for example the relationship between man and machine.

Our authors come from both teaching and industry and combine application with a scientific background. Also, the number of English-language titles increases steadily. Thus our program is interesting for a broad audience.

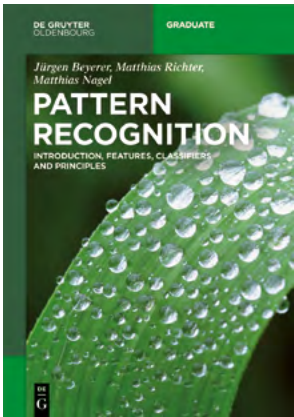

WE OFFER

- ▶ **Renowned authors**
- ▶ Well-established **textbooks**
- ▶ All publications regularly revised
- ▶ **Interdisciplinary topics**
- ▶ The very latest research and teaching in both German and English

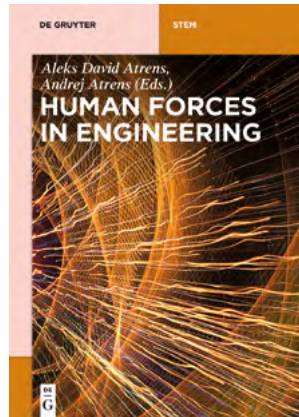

Subject Areas:

- ▶ Fundamentals
- ▶ Control Engineering and Metrology
- ▶ Automation
- ▶ Signal Processing
- ▶ Systems technology
- ▶ Technical mechanics
- ▶ Energy Technology
- ▶ Process Engineering
